The Beginning of Wisdom

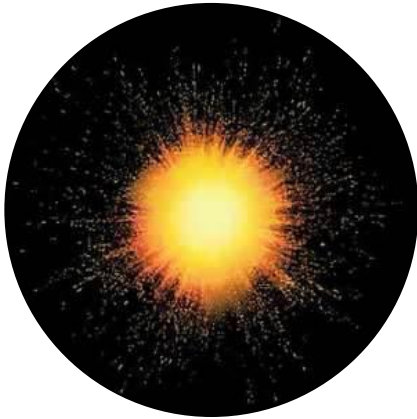

I will write to you concerning the knowledge and understanding that God has given me. I will attempt to write as often as I can. Maybe someday you will share with others including me when they/I need it most.

Forget all that you think you know and surrender to new understanding. Let the Spirit lead and guide you in this journey of knowledge and wisdom. Take your time and savor each thought.

The first topic that I want to discuss is **God**. I will spend a great deal of time here because there is much to discuss and everything else that we discuss hinges on understanding **God**. Moses who is the believed writer of Genesis starts the Bible with "*In the Beginning God...*" **Gen 1:1**. This is where I would like to start....At the beginning.

Many people question whether there is a **God** or not. The real question they should ask is whether there is **Design Intent** to our universe, people, lives. If there is **Design Intent**, which means things are **not just random or coincidence**, but they are **orderly and predictable**, then there has to be a **Designer**. It is this **Designer** that I want to discuss first. For the believer, this **Designer** is what most people call **God**.

In 2012 I watched a documentary show called "How the Universe Works". The first episode was called the "Big Bang". In this episode, Scientists try to re-create what they believe happened at the very moment of creation of our Universe some 14 billion years ago. Little did they know that they were trying to describe Gen 1:1 with all their knowledge of the physical world. All of the scientists agreed on the physicals, but none could explain what/who started that first "Bang". They avoided that question and left that question to **faith**. And rightly so because **there is no way that physical data can describe God, The Creator. We cannot put Him in a book or church or a religion or box or computer or mind...** We have to have **faith**, and we have to see **Him** in the **Spiritual Realm** to even imagine **His Person**.

Here are some of the highlights that the Scientists describe in Episode 1:

- **The Universe was created from nothing. Something was created from absolutely nothing.**
- **The "Big Bang" was so powerful and intense that words cannot describe it.**

- Everything physical that exists in the universe (billions of galaxies, stars, planets...) was created at that moment.
- It all happened in less than a second. In fact it happened so fast that they had to create a new time scale call "Planck" time. There are more units of "Planck" time in one second than there are seconds since time began 14 billion years ago.
- The Universe has exactly the right amount of gravity. With any less gravity, the universe would continue to expand and not exist. With any more gravity, the universe would shrink into black holes and not exist. The Designer got the balance "Just Right".
- In our early universe there was both Matter and Anti-matter that when connected canceled each other out. Except the Designer added one extra piece of matter for every piece of anti-matter. This allows us to have our physical universe.

These are just a few highlights of the show. Hope you can watch it sometime. What it says about **God** is that He is the **Most Powerful Designer** of All Time. And if He could do All of this in the Creation Process before we knew life as Humans, **How Great is His Power**. We must start our learning knowing the **All Powerful, All Knowing God of Creation** who is everywhere at All times. **Everything in Heaven, Earth and the Universe was created by Him and without Him Nothing exists.** This revelation is the Fear of God. This is where we begin our journey. Think on these writings for a while and we can discuss more after this marinates inside you. **How Great is Our God?**

***"The fear of the Lord is the beginning of wisdom, And the knowledge of the Holy One is understanding."** Proverbs 9:10*

Peace and Love,
The Most Blessed Man on the Planet
